

## Why is OtsAV so unique and different from other software?

OtsAV is a breakthrough application that allows DJs, TV & Radio Stations, Background Music Providers and AV Enthusiasts to manage, play, mix, and manipulate pre-recorded music and video media in a manner never before possible with a standard Windows PC.

OtsAV heralds an exciting new age, delivering the power of automation intelligence and allowing professionals to focus on the more important areas of creativity which distinguish them from the rest. Complementing the automation is the ability to override and take control hands-on, when desired, in many facets right down to scratching, time-scaling, and beat mixing audio and video media with instant-response audibly and visually.

OtsAV features a host of integrated technologies making it unlike any other software on the market, while providing rock-solid stability, instant-response latency for both audio and video, and an easy to use interface. Technologies include automated fade-mixing (Ots Labs IntelliFade Technology™), automated beat mixing (Ots Labs BeatMorph Technology™), smooth video mixing and presentation (Ots Labs TrueSmooth Technology™), karaoke CD+G presentation, high quality time-scaling down to stationary and up to double-speed (Ots Labs ClearScale Technology™), scheduling & logging, AGC/Compressor/Limiter dynamics processing (volume management), EQ, pitch and direction control, scratching, powerful search and querying, and much more.

## NEW! MIDI Hardware Control and "Old School" Mode

Add your favourite MIDI controller to your favorite DJ software! Music and Video mixing has never been easier!

## Automated Beat Mixing, Video Module and Karaoke CD+G Module

World-first, features which allow you to do more than you ever thought possible

## Video and Karaoke CD+G playback

## The smoothest video playback ever

## Continuous flow auto-mixing

The world's most accurate auto mix point detection

## Smooth audio

Dynamic volume processing with AGC/compressor/limiter

## Responsive and predictable

Zero-latency instant response controls

## Unprecedented control

Play CDs (and MP3s) backwards, forwards, time-stretched or pitch shifted with CD-DA

## Powerful Media Library and Scheduling

Automatically schedule, query, search and categorize with ease

## Enjoy reliability and efficiency

Lean & mean architecture

intelligence for  
your audio & video.

## Background music users...

Discover the reliable, no-nonsense ease of providing smooth background music and video, with a professional "radio" sound, delivering that special ambience to your clients...

**Discover why our customers rave about what OtsAV does...**

**\*Automated Mixing:** Continuous flow auto-mixing with world's most accurate auto mix point detection.

**\* Live Scratching and Scratch Sampler:** Manipulate OtsAV's virtual turntable any way you like and hear the exact same sound you would hear with real vinyl! Record scratches for later use or to swap with friends!

**\* Media Library:** Organize your media and powerfully query the Media Library with the Ots Media Query Language (OMQL) to aid with finding suitable items and creating incredibly intelligent playlists.

**\* Powerful and fast search facility**

**\* Professional broadcast dynamics processor**

**\* Integrated Graphics EQ**

**\* Remote Access Control:** Enables control via network or internet

**\* Easy to use list management and layout**

**\* Deck Pitch/Tempo Adjustments**

**\* Direction Control and Reverse Play**

**\* Integrated Software Mixer**

**\* Album cover graphics handling**

**\* Instant response on all controls - zero-latency!**

**\* Ots Album file, Wave, MP3, and Audio CD support.**

**\* SHOUTcast Integration:** Upload the OtsAV output signal directly to a SHOUTcast server. Be the best sounding station!

**\* Separate Cue Channel** with stereo separation by deck mode, making beat mixing a lot easier!

**\* Multi sound card support:** Use a totally different sound card for your cue channel.

**\*Video module:** Play and mix **music videos** in **DVD quality** to your 16:9 (widescreen) or 4:3 TVs and projectors in your venue.

**\*Slideshow:** Display pictures promoting your business or services when no video clips are being played. Take photos of your guests and **show them on the big screen.**

**\*Karaoke CD+G module:** Play **CD+G karaoke** clips for your guests to sing along to.

**\*Ticker:** Display **scrolling text** to promote services, call up the next singer, or wish someone a Happy Birthday!

**\*Automated BPM Detection and Beat Mixing:** Analyze your music and videos for accurate Beats Per Minute.

**\*Powerful Playlist Generator** including Station ID support. OtsAV can intelligently select songs by category or rating.

**\*Live input:** Allowing external audio sources to be routed via OtsAV's audio pipeline, including the dynamics processor!

**\*Winamp Visualisation PluginSupport:** Use many of the established Winamp visualisation plugins.

**\*Record your mixes:** The Save as Wave feature enables you to burn non-stop party mix CDs with ease, professionally mixed and dynamics processed!

**\*CD-DA Direct functionality:** Play audio CDs in the OtsAV environment without ripping first!

**\*Scheduling and Logging module:** Operate a radio/TV station or background music/video system automatically with integrated scheduling which can intelligently select music endlessly.

**\*Full Integration:** OtsAV, Scheduling & Logging module, Video module, and the Karaoke module can all be used together, allowing countless configurations.
